Personal Profile System® Graph Multiple PPS/RBA Comparison

The Multiple PPS/RBA Comparison Graph displays individual differences in both role behavior expectations and natural behavioral style. The RBA and PPS both use the DiSC® Dimensions of Behavior, so the behavioral intensities can be displayed together. This graph shows potential fit based on the responses to the PPS and RBA rather than actual, observed behavior. This information is most helpful when discussed and evaluated based on actual experience with the people and roles displayed.
